Reviews

I just started off reading this article pdf. It really is simplistic but shocks in the fifty percent of your ebook. You will not truly feel monotony at at any time of the time (that's what catalogues are for about when you request me).

OPERE INEDITE (2)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 36 pages. Original publisher: Golden, CO: National Renewable Energy Laboratory, 2010 OCLC Number: (OCoLC)586163331 Subject: Wind turbines -- Testing. Excerpt: . . . The turbine safely brings the rotor down to an idling speed under any wind condition. This behavior is consistent with the manuals statement that the system can be shut down at any wind speed. In addition to the automatic shutdown the controller performed, NREL also performed shutdowns by pushing the stop button on the voltage clamp. The turbine safely brought the rotor down to an idling speed any time this was performed. Behavior upon excessive vibration The turbine has no means to sense excessive vibration or to shut down should excessive vibration occur. The IEC turbine design standards require such sensors on large turbines but m2 not on turbines smaller than 200. Behavior upon loss of load When the inverters sense a grid fault, they disconnect from the grid. The voltage clamp then applies the brake. NREL tested for this by opening the disconnect switch between the ARE subpanel and panel 3-3L. This test took place on November 5, 2008 in winds of about 12 m s. The turbine shut down but then never came back online. It was found that the Insulated Gate Bipolar Transistors IGBTs in the voltage clamp had failed. Figure 6 shows the time traces of the event. A similar event during which the IGBTs failed happened during a real grid outage on June 13th. Both failures happened during winds in which the inverters were producing maximum power and the diversion loads were likely already active. On July 20, 2009, the loss of load simulation was repeated in low winds (6m s). The turbine did not sustain any damage...
